## Carolina Wilke, Co-Founder of Sacred Business Flow

---

I am very excited to share the incredible work Phil has put together here with The Sacred Business Flow Creators Stack, which will help you expand your online business with ease. While technology isn't my passion and I don't follow it closely, implementing his advice on specific tools has simplified my life significantly. I'm excited for you to share in this experience.

Phil is genuinely passionate about technology and stays current with market trends. He has a remarkable talent for experimenting with new tools and finding ways to enhance our projects. I trust him completely for advice in this area because of his expertise and unbiased approach. Whenever something new emerges, he's quick to explore and test it with his own projects.

If you're a busy entrepreneur or planning to start your online business, don't hesitate to listen to what he has to say here in The Creators Stack, as well as by joining the WhatsApp community that is included with your purchase. You can save both time and money by choosing the right apps for your needs.

In my experience, certain tools have truly changed how I work. They help me maintain consistency with tasks I find challenging and free up more time for the activities I enjoy.

I find it overwhelming to search online for tools because there are so many options, making it difficult to choose on my own. However, whenever I need a solution or a way to optimize my workflow, Phil's advice is always spot-on.

The Sacred Business Creator Stack is an expertly curated collection of best-in-class software and tools designed to meet every aspect of what it takes to run a successful online business as a creator. Phil dedicated significant time and effort to compiling a comprehensive list of the tools we utilize in our business, and continues to provide ongoing guidance on how you can leverage them to enhance personal productivity while growing your business, when you join the included WhatsApp community.

Learning about the app Mem.ai transformed the way I manage my notes, from capturing inspiring quotes to crafting my newsletter and other creative content. It continues to help me write more efficiently and keeps everything organized. Its incredible chat tool allows me to find anything I need in seconds. Plus, I can record ideas in different languages and get instant, accurate translations.

Another big one for me personally was Content Studio. It allows me to create multiple social media posts at once and publish them across different platforms like Instagram and Facebook without needing to log into each one separately. This helps me be more productive and reduces distractions from social media.

These tools streamline our processes through automation, enhancing our professional image and building trust with clients. By eliminating repetitive tasks, they save us valuable time, allowing us to focus on delivering high-quality work and fostering stronger business relationships.

For our clients, it's amazing to witness how much they gain from a strategic viewpoint by using the tools Phil recommends. Beyond that, in my work, I observe how these tools not only amplify their creative energy but also contribute to a more balanced nervous system.

A reliable calendar/scheduling tool, for instance, can open up space for productivity and enhance your confidence, demonstrating that you can grow your business without sacrificing your freedom. This method empowers our clients to progress in a truly impactful way.

If you are ready to expand your business or start a new one, make your life more organized and efficient, and want to have more time for what you love, you should definitely check out the Sacred Business Creators Stack.

If technology isn't your passion and you lack the time and patience to research and test various tools, this will be incredibly helpful for you.

## Here's What Other People Have to Say ...

**Marc Angelo Coppola, Author**

---

"Phil is a wizard amongst the normal folk when it comes to his knowledge of systems, tools, and marketing strategy. He is systematic and impeccably prolific at what he does and takes the idea of being a genius or geek at what he does to the next level."

**Garrett Adkins, Impact Media**

---

"When it comes to system architecture, there is no one quite like Phil. To the untrained eye, the systems he sets up look like code crossing the screen in the matrix, but it all makes complete sense and serves a specific purpose. Few people do automation and marketing right. Phil is one of these people".

**Jackie Sunga, Online Course Expert**

---

"It's been 24 business days since this program officially started. I've already 3x'd my investment in AI with people who found me and felt safe to invest after very empowering discovery calls - not to mention the moments of emotional attunement, consent, and joy. So THANK YOU!"

## Administrative

---

Administrative apps help you to efficiently manage various aspects of your operations.

These apps simplify day-to-day tasks, enhance productivity, and help maintain organization, which is crucial for the success and growth of any business.

## LastPass

---

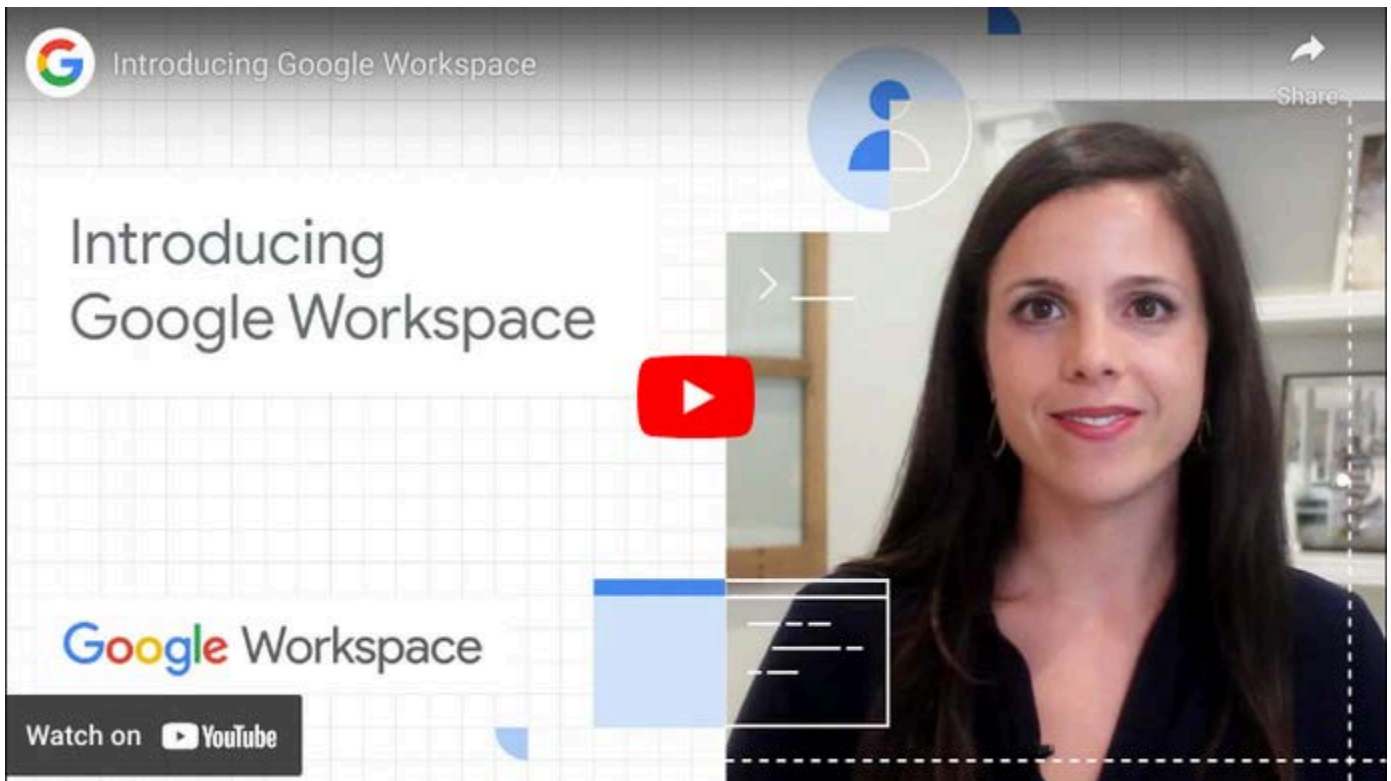

LastPass enhances digital security through these features:

- Local-Only Encryption: Encrypts data on your device for enhanced security.
- Cross-Device Compatibility: Syncs across all devices for seamless access.
- Secure Sharing: Safely shares information among teams or families.

This tool ensures that your sensitive information remains secure and conveniently accessible.

**How we use it:** Makes remembering your passwords easier!

[Where To Find Or Access It](#)

## Google Workspace

---

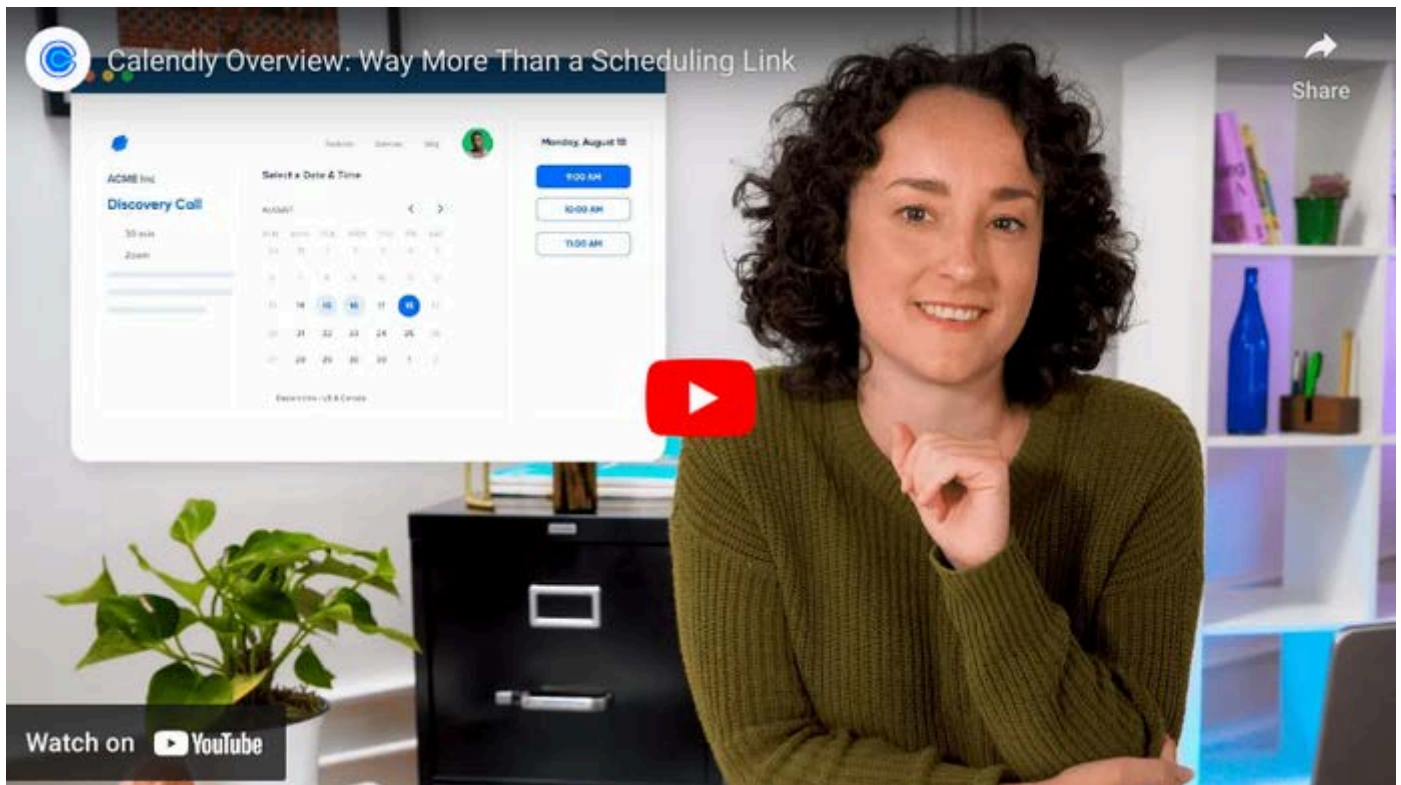

An integrated suite of cloud-native collaboration and productivity apps by Google, including Gmail, Calendar, Drive, Docs, Sheets, Slides, and Meet. Work in real-time with secure communication, AI-powered tools, and cloud storage.

Access your files anywhere, streamline workflows, and boost productivity with enterprise-level security.

Scalable for businesses of all sizes, Google Workspace offers a flexible, secure, and powerful environment for teams to collaborate and communicate effectively.

**How we use it:** Gmail, Google Sheets, and Docs.

[Where To Find Or Access It](#)

## Calendly

---

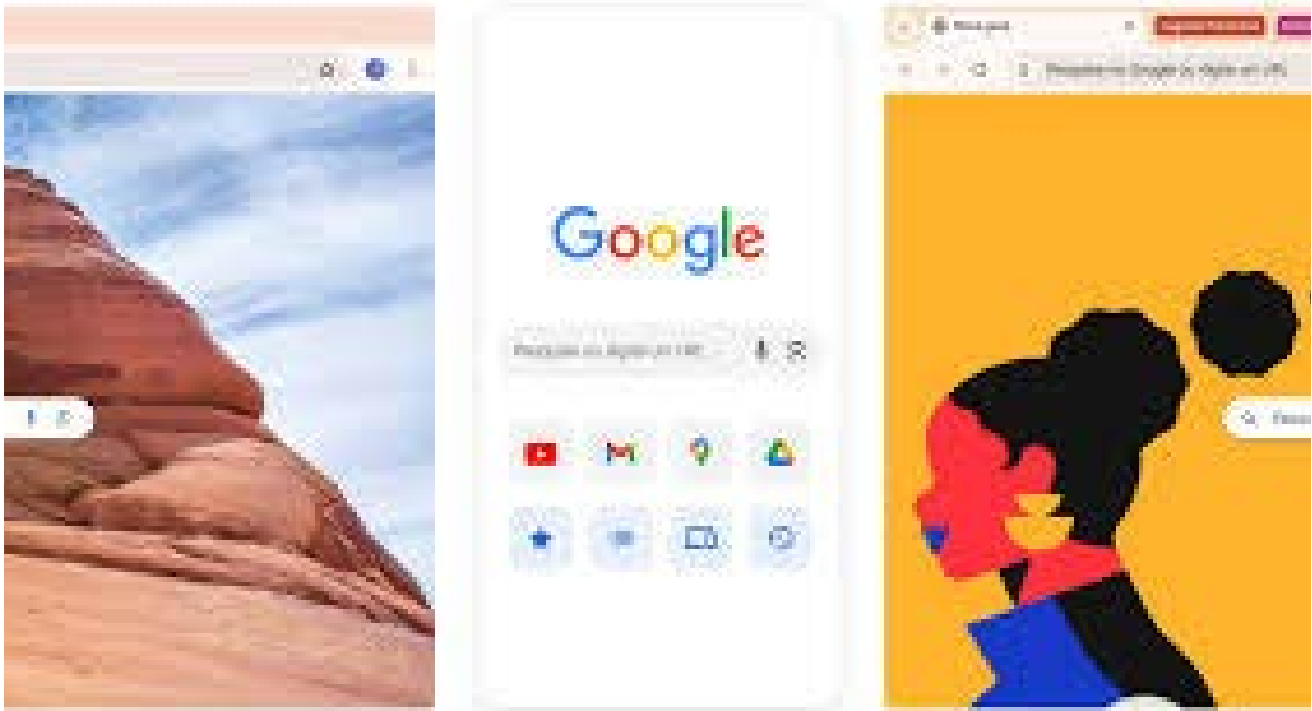

A smart scheduling tool that eliminates the hassle of finding meeting times.

Share your availability with a link, and others can book meetings that sync with your calendar (Google, Outlook, etc.).

Customize meeting preferences, set buffer times, and automate reminders. Ideal for individuals and teams, Calendly saves time, improves efficiency, and offers a seamless booking experience, allowing you to focus on productivity without the back-and-forth of coordinating meetings.

How we use it: For scheduling all meetings and in book a call funnels.

[Where To Find Or Access It](#)

## Google Chrome

---

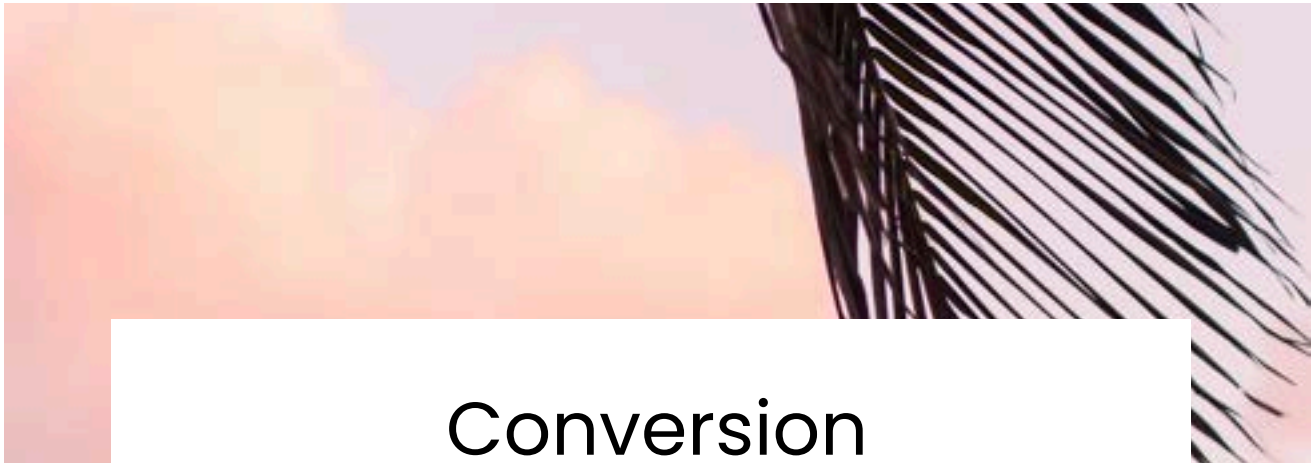

A fast, secure web browser that delivers a seamless online experience. Chrome loads websites quickly, protects against malware and phishing, and lets you customize with extensions and themes.

Sync your bookmarks, history, and settings across devices for a unified browsing experience. Chrome is ideal for anyone who values speed, security, and personalization, making it the go-to browser for staying efficient and protected online.

**How we use it:** Web browser of choice. Not sexy but always works.

[Where To Find Or Access It](#)

## Conversion

Conversion apps help you to optimize your websites and marketing strategies to increase user engagement, capture leads, and ultimately drive sales.

These apps provide insights, personalize experiences, and encourage visitor interactions, all of which contribute to higher conversion rates.

## Visitor Tracking

---

A powerful tool for tracking website visitors and gaining insights into user behavior.

VisitorTracking.com provides real-time data on who visits your site, how they interact with it, and where they come from.

Customize reports, set up alerts, and segment visitors to understand your audience better. Ideal for businesses looking to optimize marketing strategies and improve conversions, Visitor Tracking helps you make data-driven decisions without the guesswork.

**How we use it:** For on-site analytics across all web properties.

[Where To Find Or Access It](#)

## Right Message

---

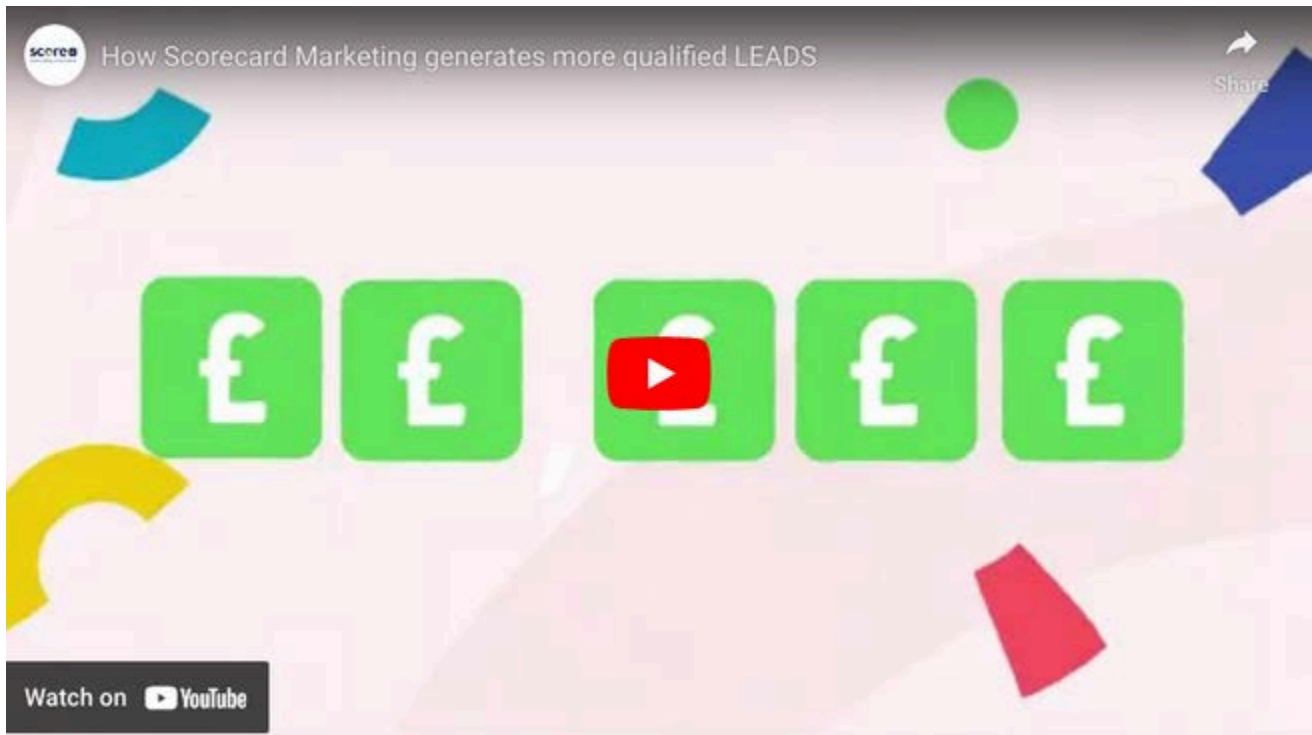

A personalization tool that tailors your website's content to each visitor.

RightMessage lets you segment your audience, customize messaging, and create dynamic experiences based on user behavior. Integrate with your existing tools, and use real-time data to show the right message to the right person.

Ideal for businesses aiming to boost engagement and conversions, RightMessage helps you deliver personalized experiences that resonate with your audience.

**How we use it:** for on-site segmentation for opt-ins.

[Where To Find Or Access It](#)

## Score App

---

A quiz funnel builder that helps you generate leads and engage your audience. ScoreApp lets you create interactive quizzes that provide personalized results, driving higher conversions. Customize questions, capture contact details, and analyze data to optimize your marketing efforts. Ideal for businesses looking to attract qualified leads and nurture them with tailored content, ScoreApp helps you turn engagement into actionable insights.

**How we use it:** for the harmony map assessment at <https://harmony.sacredbusinessflow.com>

[Where To Find Or Access It](#)

## Involve.me

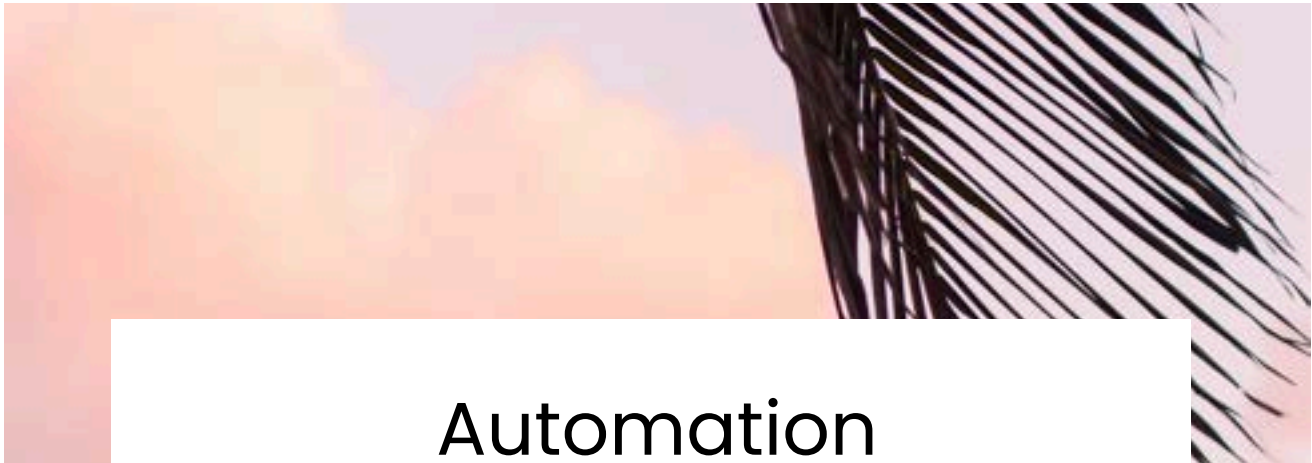

---

An interactive content builder that helps you engage and convert your audience. involve.me allows you to create quizzes, surveys, calculators, and forms without coding.

Customize designs, capture leads, and analyze results in real-time. Ideal for businesses aiming to boost engagement and increase conversions, involve.me helps you create personalized, interactive experiences that resonate with your audience.

**How we use it:** For on site surveys, onboarding, client progress tracking etc. For example, we use this for our Sacred Growth Club Weekly Progress Tracking for members.

[Where To Find Or Access It](#)

## Automation

Automation apps enable you to streamline repetitive tasks, integrate various tools, and focus on strategic activities that drive growth.

These apps reduce manual work, improve accuracy, and ensure that processes run smoothly without constant oversight.

## Zapier

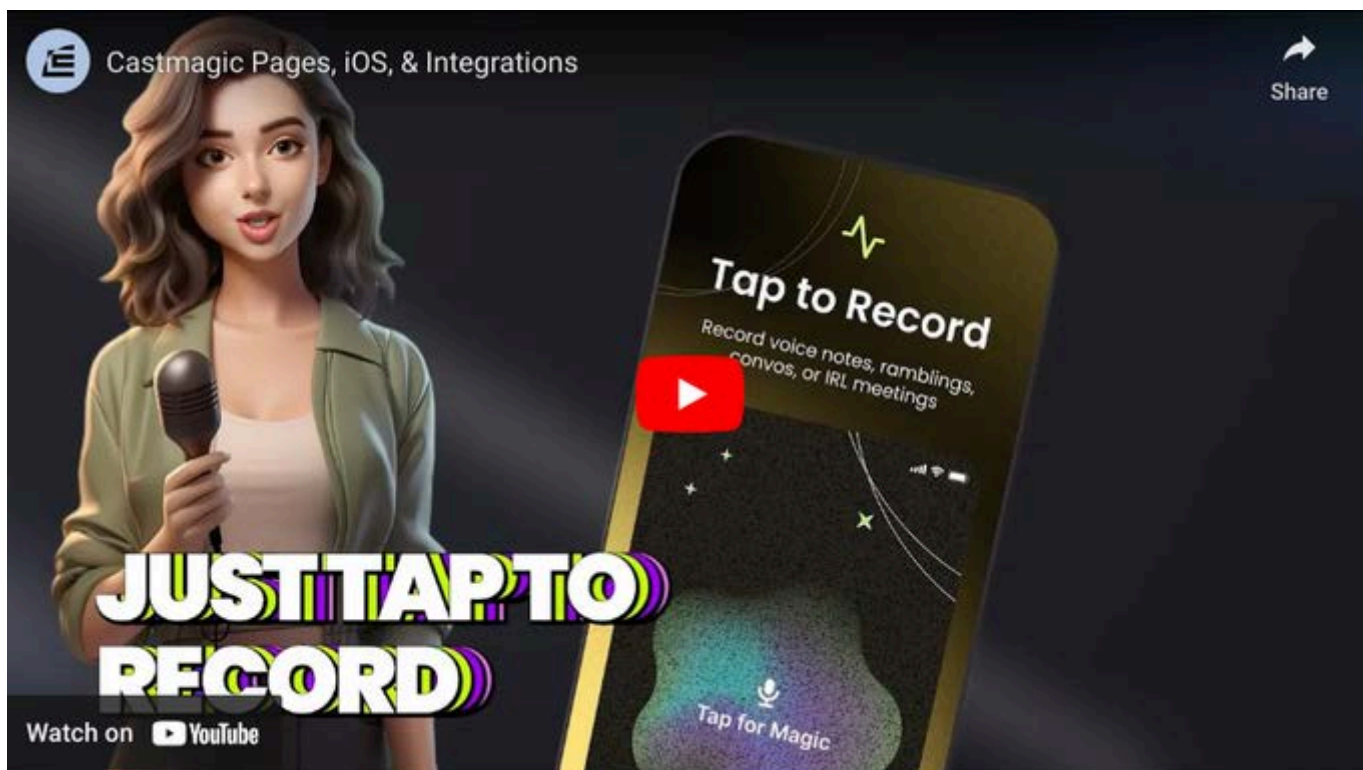

---

An automation tool that connects your apps and streamlines your workflows. Zapier lets you create "Zaps" that automate repetitive tasks between different apps, saving you time and reducing manual work.

With no coding required, you can customize workflows to fit your needs and integrate over 5,000 apps. Ideal for businesses and individuals looking to boost efficiency, Zapier helps you automate tasks so you can focus on what matters most.

**How we use it:** Basically duct tape between all our systems and tools so they "talk" better, and data flows without manual entry.

[Where To Find Or Access It](#)

## CastMagic

---

An AI-powered tool that transforms your podcast content into shareable assets. Castmagic automates the creation of show notes, transcripts, social media posts, and more from your podcast audio.

Customize output to match your brand's voice and streamline your podcast production workflow. Ideal for podcasters looking to save time and amplify their content, Castmagic helps you maximize the reach and impact of each episode with minimal effort.

**How we use it:** For Zoom call transcriptions, video summaries for weekly messages, and creating repurposed content related to videos we have created from Sacred Growth Club.

[Where To Find Or Access It](#)

## Community

---

Community apps help you foster strong relationships with your customers, members, or followers.

These apps provide platforms where users can connect, share, and engage with each other, which is crucial for building a loyal and active community around a brand or business.

# Circle

# Heartbeat

## Circle

---

A community platform that brings your audience together in one place. Circle lets you create a branded space for discussions, content sharing, and member engagement.

Customize your community, host events, and integrate with your existing tools. Ideal for creators, businesses, and organizations looking to build meaningful connections, Circle helps you foster a vibrant, interactive community that grows alongside your brand.

**How we use it:** This one comes with a slight caveat. Phil uses it for a legacy membership, but we currently use Heartbeat, mostly because we have a lifetime deal. Otherwise, we would use Circle.

[Where To Find Or Access It](#)

## Heartbeat

---

A community platform designed to connect and engage your audience. Heartbeat offers features like chat, forums, events, and resource sharing, all in one customizable space. Integrate with your favorite tools and manage your community effortlessly.

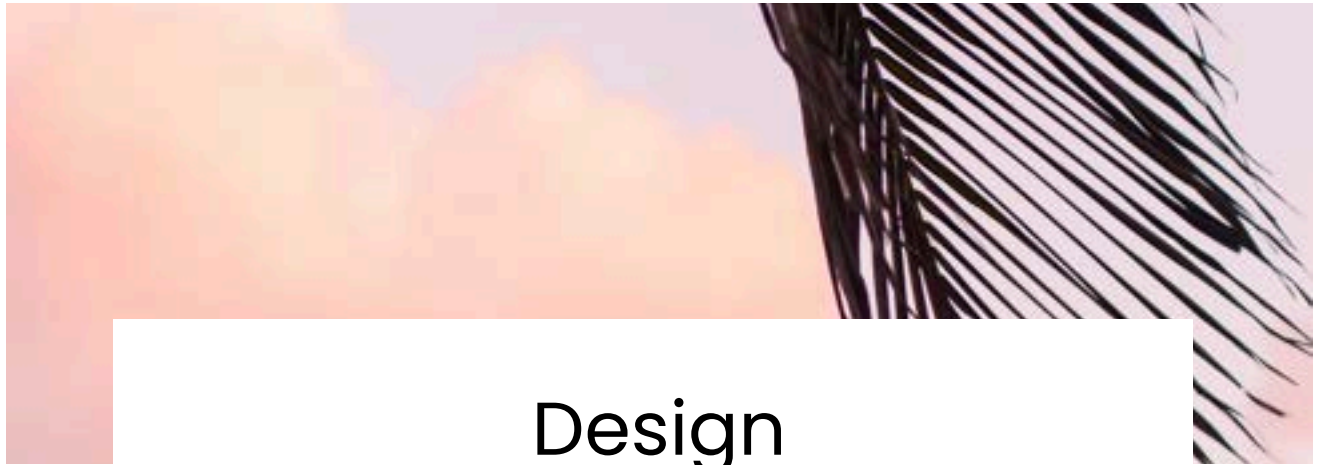

Ideal for creators, educators, and teams looking to build strong, interactive communities, Heartbeat helps you cultivate meaningful connections and streamline community management.

**How we use it:** We host our Sacred Growth Club community events using Heartbeat, including leveraging the Zoom integration to organize call recordings.

[Where To Find Or Access It](#)

# Sacred Business Flow Creators Stack

---

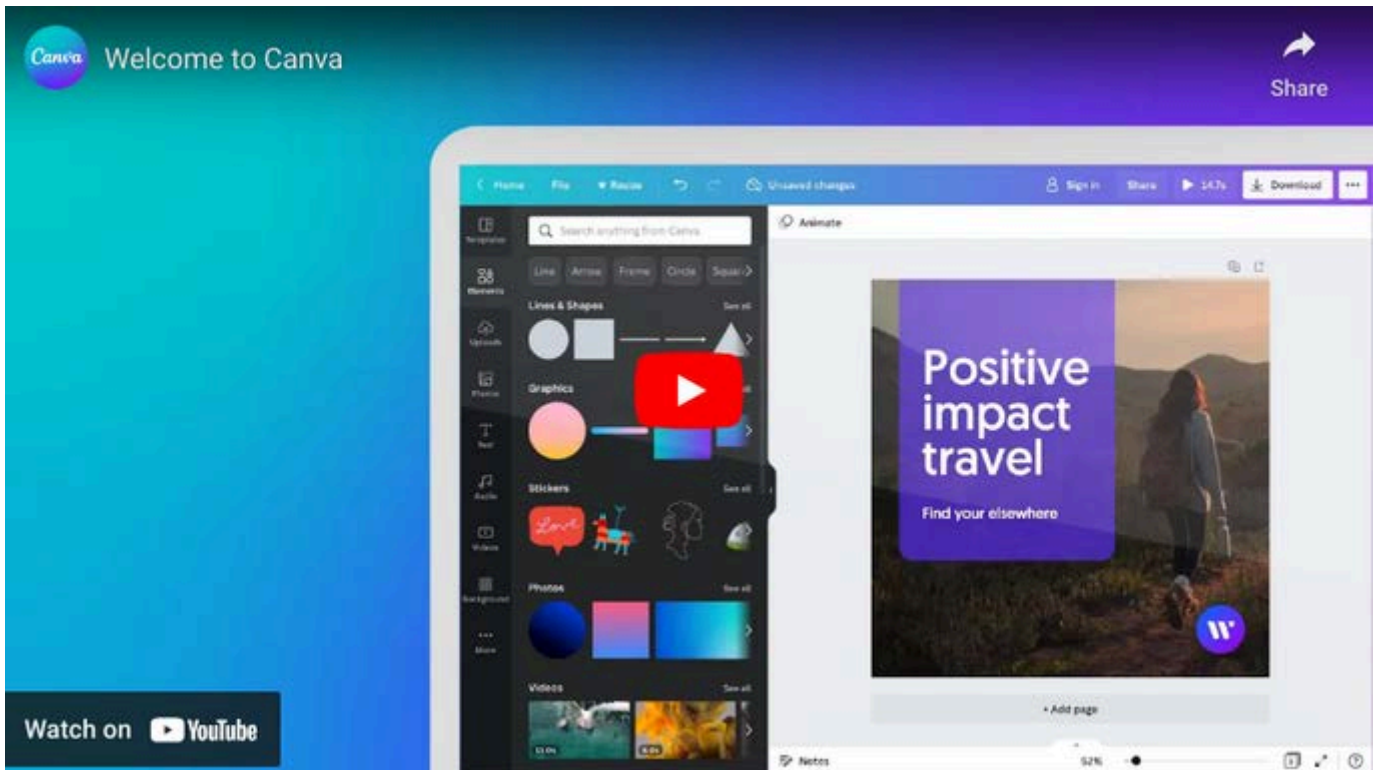

## Design

---

Design apps help you to create professional, eye-catching visuals without extensive graphic design experience.

These tools empower you to produce high-quality designs for marketing, branding, and social media, which are essential for attracting and engaging customers.

## Canva

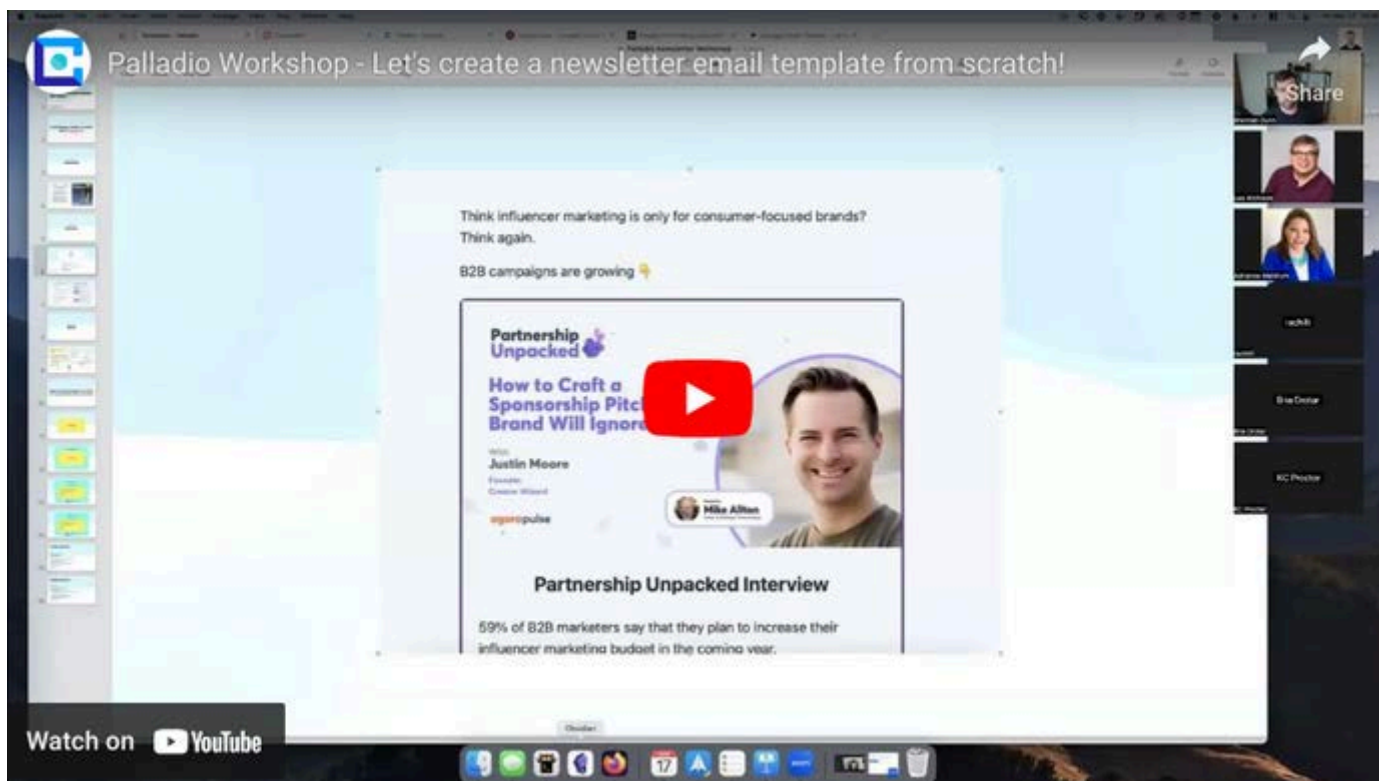

---

A versatile design tool that empowers anyone to create stunning visuals. Canva offers an intuitive drag-and-drop interface with thousands of templates for everything from social media posts to presentations.

Customize designs with photos, icons, and fonts, or collaborate with your team in real-time. Ideal for businesses, marketers, and individuals looking to create professional-quality designs quickly, Canva makes design accessible to everyone, regardless of skill level.

**How we use it:** We create all design elements within Canva, including our social media quote posts. It's incredible what you can do with Canva.

[Where To Find Or Access It](#)

## Palladio

---

A no-code platform for creating and deploying AI-powered apps. Palladio enables you to build custom AI applications without any coding, using intuitive drag-and-drop tools.

Integrate machine learning models, automate workflows, and deploy apps easily. Ideal for businesses and developers looking to harness the power of AI without technical complexity, Palladio helps you bring innovative AI solutions to life quickly and efficiently.

**How we use it:** Our ConvertKit newsletter template was designed using Palladio.

[Where To Find Or Access It](#)

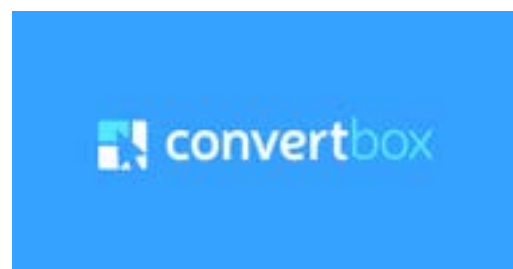

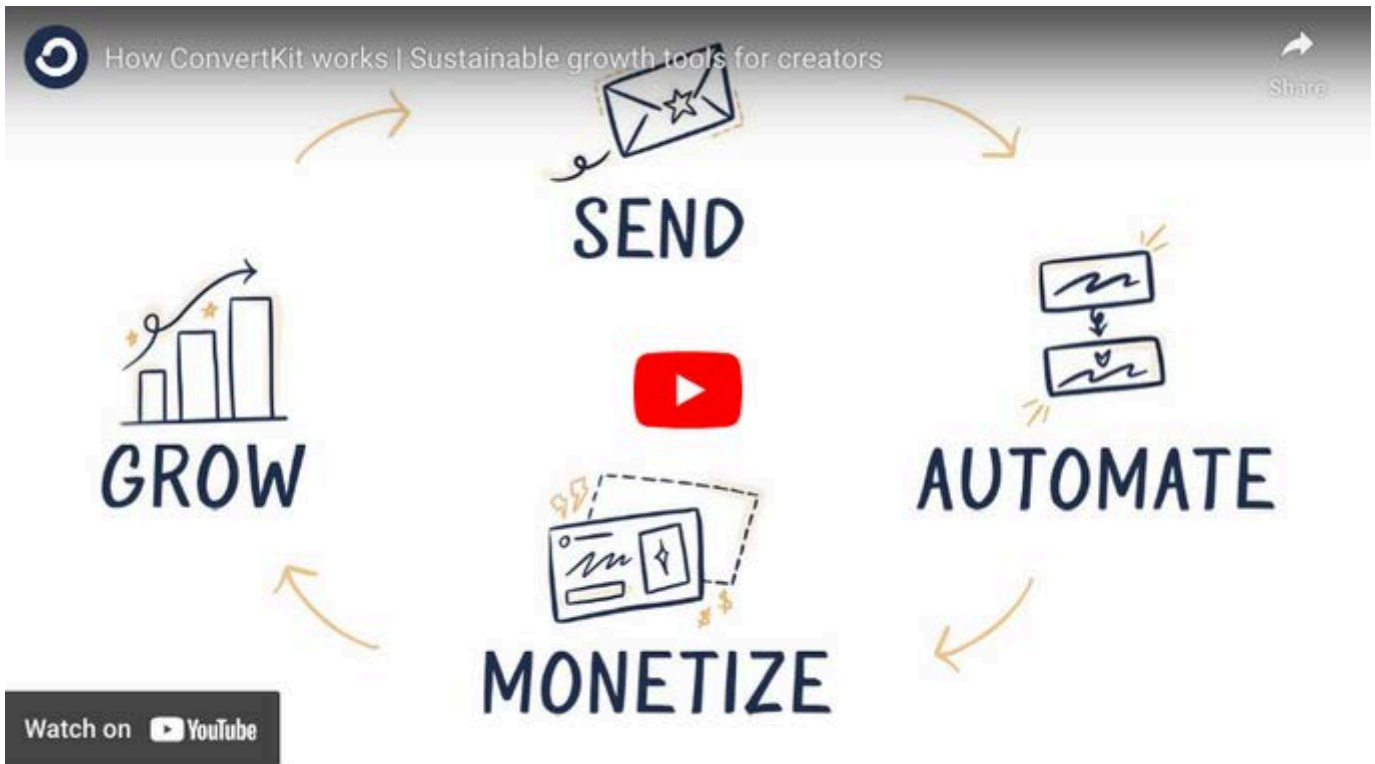

## Email Marketing

---

Email marketing apps are vital if you are looking to build relationships with your audience, nurture leads, and drive conversions.

These apps offer powerful features for creating, managing, and optimizing email campaigns, ensuring that businesses can effectively reach their target audience.

## ConvertKit

---

An email marketing platform tailored for creators. ConvertKit lets you build and manage email lists, create automated funnels, and send targeted campaigns with ease.

Use customizable forms, landing pages, and segmentation tools to grow your audience and drive engagement. Ideal for bloggers, artists, and small businesses, ConvertKit helps you connect with your audience and turn followers into loyal customers through effective email marketing.

**How we use it:** To host our newsletter, as well as simple form opt-ins for things like our Facebook group.

[Where To Find Or Access It](#)

## Convertbox

---

ConvertBox is an on-site engagement platform designed to create personalized offers, lead capture forms, and segmentation surveys to target the right visitors at the right time. It features drag-and-drop simplicity, A/B split testing, and real-time analytics.

The platform integrates with various marketing tools and offers a range of customizable templates for different stages of the sales process. ConvertBox is available for a one-time fee, providing lifetime access without ongoing charges.

**How we use it:** For embedded opt-ins on our main website for the Harmony Map Assessment.

[Where To Find Or Access It](#)

# Sacred Business Flow Creators Stack

---

## Finance

---

Finance apps enable you to manage your finances effectively, track expenses, and ensure profitability.

These apps provide features for budgeting, accounting, and financial planning, which are crucial for maintaining financial health and making informed business decisions.

By leveraging apps in this category, you can gain better control over your finances, leading to more sustainable growth and profitability.

**YNAB.**

 **collective**

 **INTUIT  
quickbooks**

## Profit First

---

"Profit First" by Mike Michalowicz is a financial management approach designed to help small businesses become more profitable by prioritizing profit over expenses.

The system advocates allocating income into separate accounts for profit, taxes, owner's pay, and operating expenses, ensuring that profit is taken out first. This method helps business owners maintain better financial discipline and avoid overspending.

**How we use it:** It's not software, but this is a really important part of our financial system, so I think it's worth mentioning. We use Profit First within YNAB for creating budgets.

[Where To Find Or Access It](#)

## YNAB

---

You Need a Budget (YNAB) is a personal budgeting software designed to help individuals take control of their finances. The system is based on four rules: give every dollar a job, embrace your true expenses, roll with the punches, and age your money.

YNAB aims to help users break the paycheck-to-paycheck cycle, get out of debt, and save more. The software offers features like real-time syncing, goal tracking, and detailed reporting.

**How we use it:** In a non-traditional way for business budgeting, using the Profit First System.

[Where To Find Or Access It](#)

## Collective

---

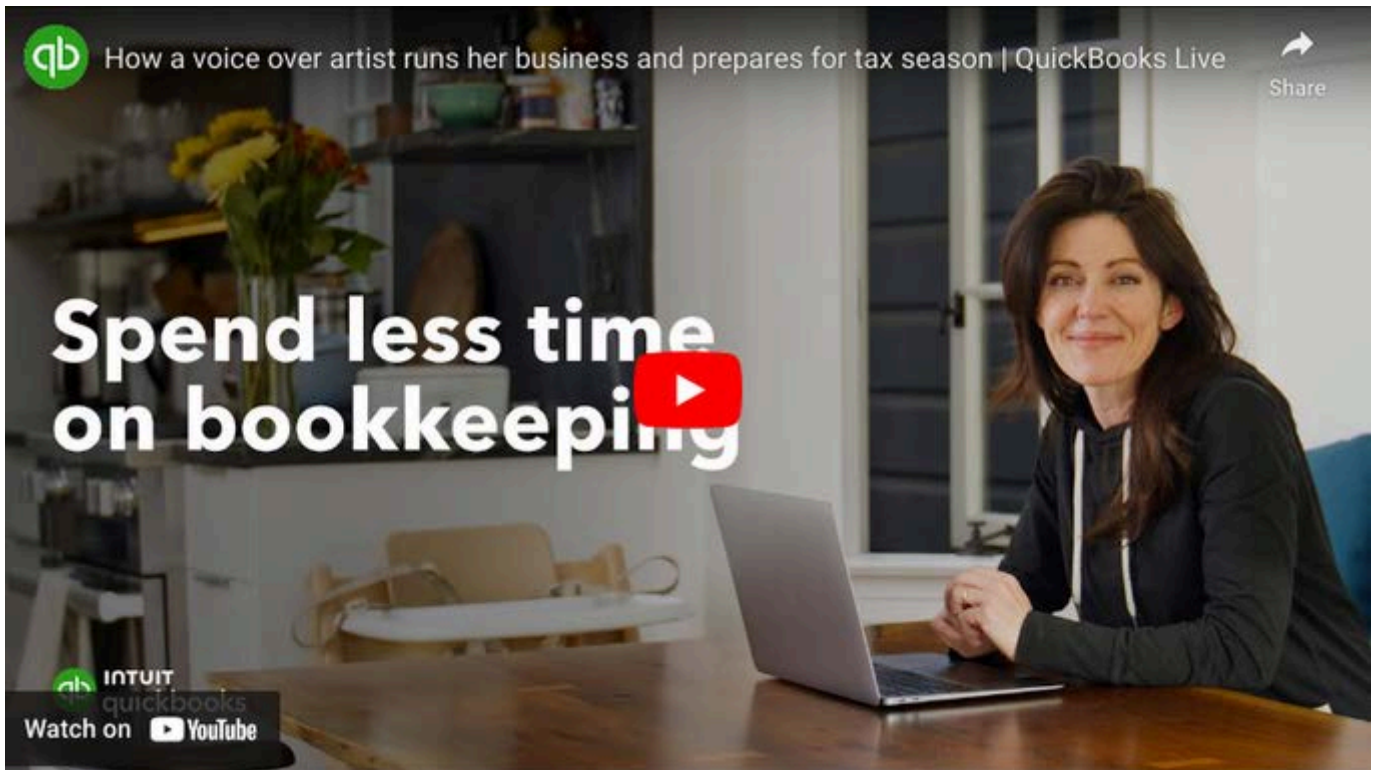

Collective is a platform designed to simplify financial management for businesses of one, including freelancers, consultants, and other self-employed professionals.

It provides services like LLC formation, S-Corp tax filing, bookkeeping, payroll, and tax services. The goal is to help independent workers manage their finances and taxes efficiently, allowing them to focus on their work while Collective handles the administrative side.

**How we use it:** For bookkeeping and filing annual taxes, as well as managing quarterly estimates.

[Where To Find Or Access It](#)

## QuickBooks

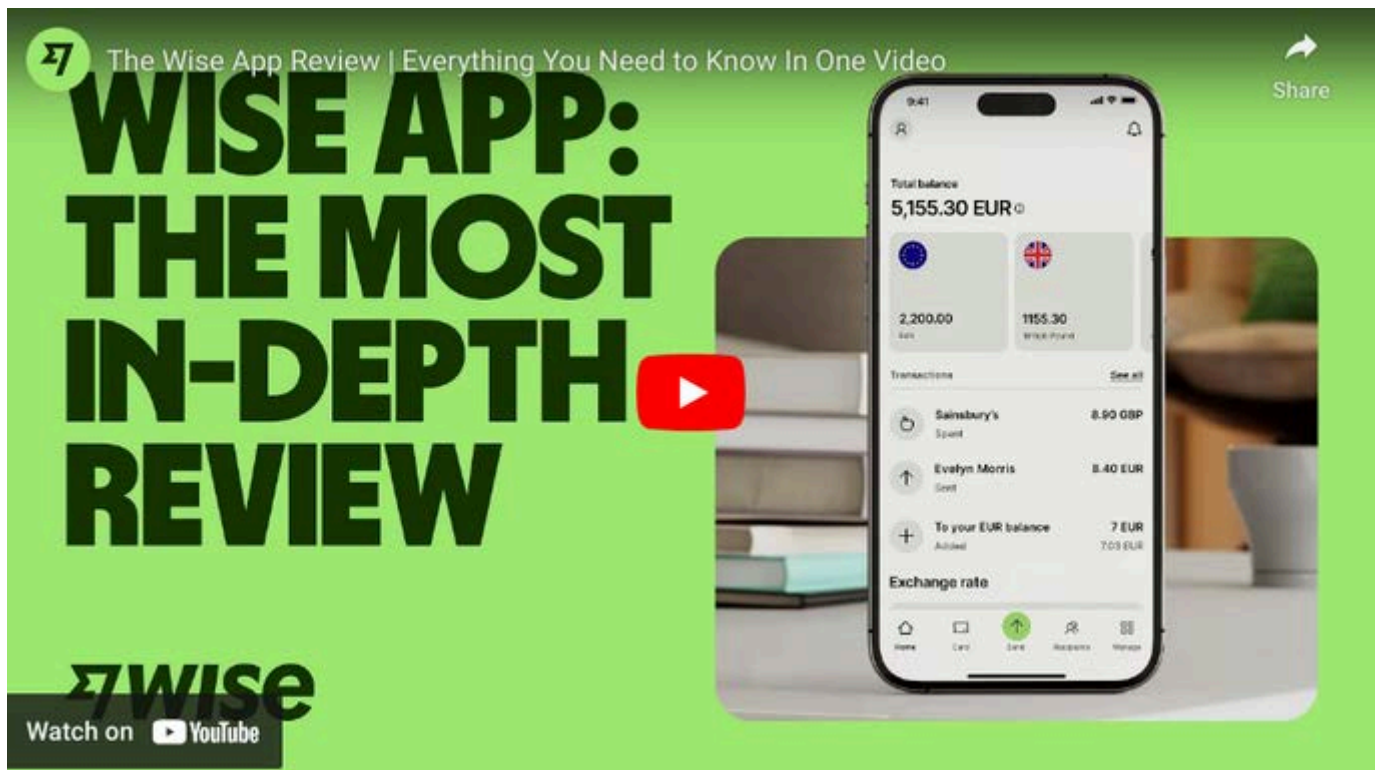

---

QuickBooks Online by Intuit is a cloud-based accounting software tailored for small businesses. It offers features like invoicing, expense tracking, payroll, and financial reporting.

The platform integrates with various apps and provides tools for managing sales, tax filing, and cash flow. Users can access their financial data from anywhere, making it easier to stay organized and up-to-date with their business finances.

**How we use it:** This is being phased out as Collective moves to their own in-house software, but we have been using Quickbooks for years!

[Where To Find Or Access It](#)

## Wise

---

Wise (formerly TransferWise) is a financial technology company that offers international money transfer services.

It allows users to send money abroad with low fees and transparent exchange rates, typically lower than traditional banks. Wise also provides multi-currency accounts, enabling users to hold and manage money in various currencies, and even receive payments like a local in multiple countries.

**How we use it:** Because we travel a lot for work, and work with a lot of international vendors, this is how we transfer money across borders when necessary.

[Where To Find Or Access It](#)

## Payment Processing

---

Payment processing enabling you to to securely accept payments from customers across the globe.

These apps streamline the checkout process, handle transactions efficiently, and provide robust security features to protect both the business and its customers.

By integrating these tools, you can offer your customers a seamless checkout experience, support multiple payment methods, and protect your business with robust security features, ultimately contributing to smoother operations and increased customer satisfaction.

**stripe**

**PayPal**

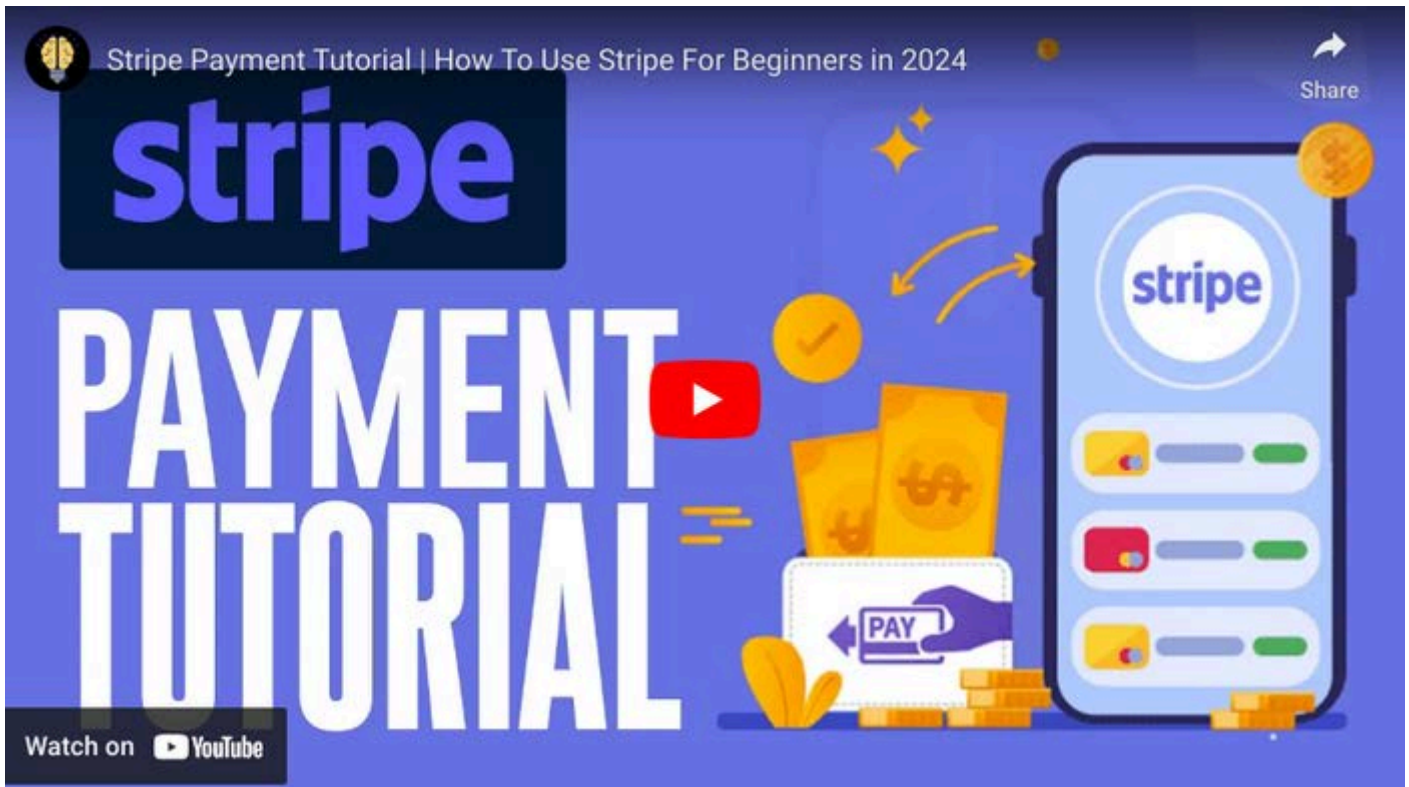

## Paypal

---

PayPal is a widely used online payment platform that allows individuals and businesses to send and receive money securely. It supports transactions in multiple currencies and offers services like invoicing, payment processing for e-commerce, and peer-to-peer payments. PayPal is known for its buyer and seller protection features, making it a trusted option for online shopping and financial transactions globally.

**How we use it:** One of our two main merchant services solutions that we use to get paid by clients via ThriveCart.

[Where To Find Or Access It](#)

## Stripe

---

Stripe is a financial technology company that provides payment processing software and APIs for businesses of all sizes. It enables online and in-person payments, supports multiple currencies, and integrates with various e-commerce platforms.

Stripe also offers additional services like billing, fraud prevention, and financial management tools to help businesses manage their finances more efficiently.

How we use it: One of two merchant service vendors we use to get paid by our clients.

[Where To Find Or Access It](#)

## Project & Task Management

---

Project and task management apps help you organize, track, and complete tasks efficiently.

These tools ensure that projects stay on schedule, team members stay aligned, and deadlines are met, which is crucial for the smooth operation and growth of any business.

By utilizing these apps, you will experience greater productivity and business success.

## Trello

---

Trello is a visual project management tool that uses boards, lists, and cards to help teams and individuals organize tasks and collaborate on projects.

Users can create boards for different projects, add lists to represent stages of a workflow, and create cards for tasks that can be moved between lists as they progress. Trello also supports features like due dates, labels, attachments, and integrations with other tools.

**How we use it:** We create our weekly, 90-day, and 25-year vision boards on Trello, as part of our Sacred Planning Process.

[Where To Find Or Access It](#)

## Things3

---

Things by Cultured Code is a task management app designed for Apple devices. It offers a clean, intuitive interface that helps users organize tasks, projects, and goals.

The app features to-do lists, deadlines, reminders, and integration with Apple's ecosystem, including Siri and Calendar. Things also supports tagging, quick entry for tasks, and project management to keep users focused and productive.

How we use it: For personal task management in detail that does not need to be shared at a high level. The nitty gritty.

Where To Find Or Access It

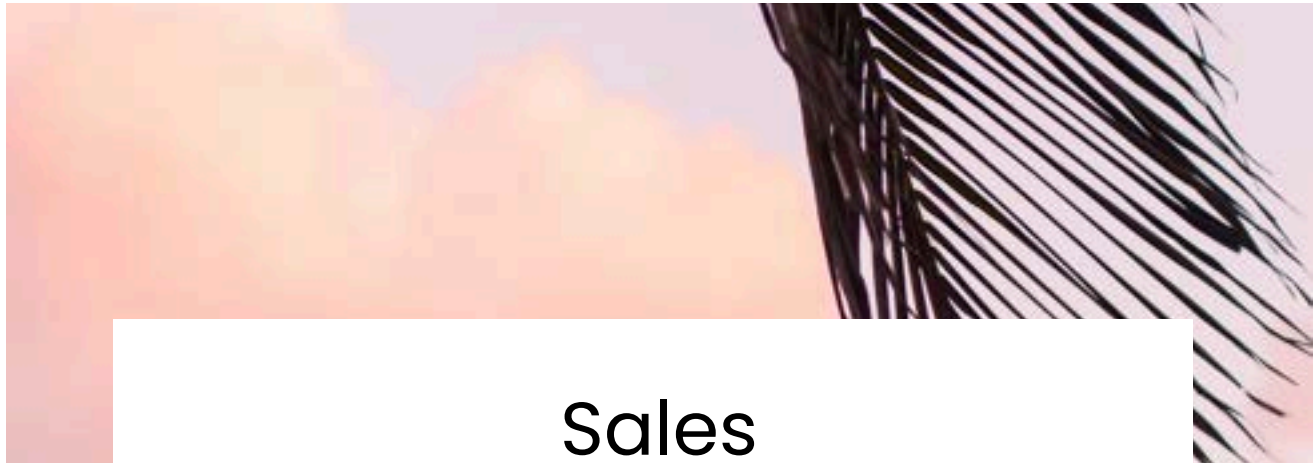

## Voicenotes

---

Voice Notes is a voice recording app designed for iOS, Android devices, and the web offering a simple and efficient way to capture audio notes. It provides features like organizing notes into folders, sharing recordings, and setting reminders. The app is user-friendly, making it ideal for quickly capturing thoughts, reminders, and other audio content on the go.

**How we use it:** For our daily review process, brain dumping, capturing random thoughts, and extensive journaling.

[Where To Find Or Access It](#)

---

Sales apps help you manage and optimize the sales process, from lead generation to conversion.

These apps provide features for automating sales tasks, tracking customer interactions, and managing sales funnels, ensuring that you can effectively grow your revenue.

## Thrivecart

---

ThriveCart is an e-commerce platform designed to help businesses create high-converting checkout pages, manage payments, and boost sales through features like upsells, downsells, and affiliate management. It supports multiple payment processors, integrates with various marketing tools, and offers detailed analytics to track performance.

ThriveCart also includes tools for managing subscriptions, taxes, and customer accounts.

**How we use it:** For all our shopping cart experiences related to getting paid by clients, for private coaching and Sacred Growth Club.

[Where To Find Or Access It](#)

## Lemlist

---

Lemlist is an email outreach platform designed to help businesses personalize and automate their email campaigns.

It offers features like customizable templates, automated follow-ups, and detailed analytics to track campaign performance. Lemlist is known for its ability to personalize emails with dynamic images and text, increasing engagement rates. The platform also integrates with various CRM systems, making it a versatile tool for sales and marketing teams.

**How we use it:** For personalized reach out at scale, for sales and marketing campaigns for ourselves and our clients.

[Where To Find Or Access It](#)

## Hubspot

---

HubSpot is a comprehensive customer relationship management (CRM) platform that offers tools for marketing, sales, customer service, and content management. It helps businesses attract visitors, convert leads, and close customers through features like email marketing, social media management, analytics, and automation.

HubSpot's CRM is free and integrates seamlessly with its other tools, making it a popular choice for businesses of all sizes looking to streamline their operations.

**How we use it:** Hubspot is a full-fledged CRM but we mostly use it to track the phase of engagement and all communication related to our private coaching clients.

[Where To Find Or Access It](#)

## Social Media Management

---

Social media management apps enable you to efficiently manage, schedule, and analyze your social media activities.

These apps help streamline the process of engaging with audiences across multiple platforms, ensuring consistent branding and maximizing reach.

**ContentStudio**

**Shor.**

## Content Studio

---

ContentStudio is a content marketing and social media management platform designed to help businesses and agencies streamline content creation, curation, and distribution.

It offers tools for discovering trending content, scheduling posts across multiple social media channels, managing campaigns, and analyzing performance. The platform also supports collaboration, making it easier for teams to work together on content strategies.

**How we use it:** To plan and schedule all our social media activities.

[Where To Find Or Access It](#)

## Shorby

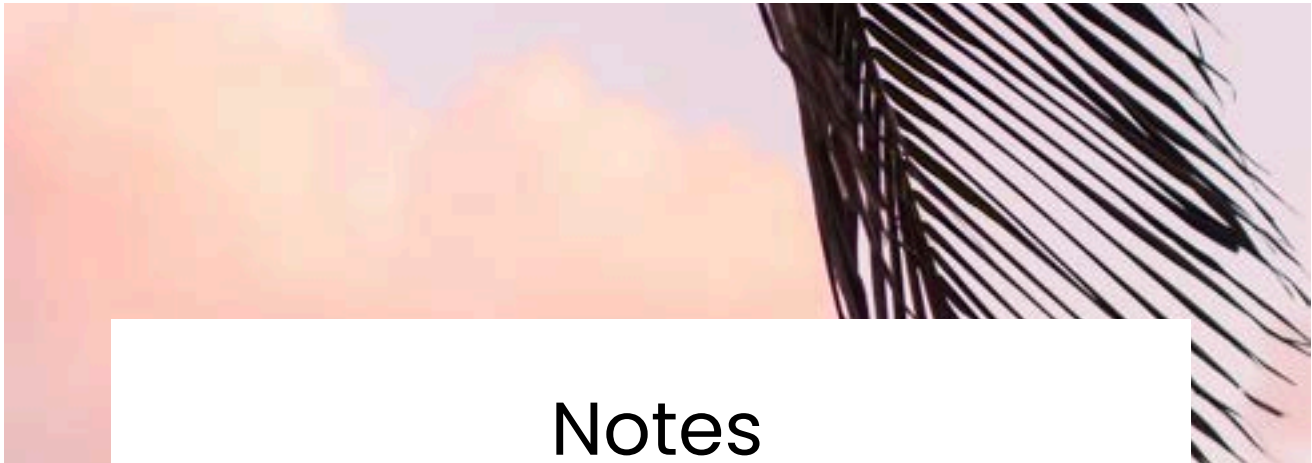

---

Shorby is a tool designed to create smart, mobile-friendly landing pages that can be used in social media bios, email signatures, and other online profiles. It allows users to compile multiple links, content, and contact information into a single, customizable page.

Shorby also offers features like click tracking and analytics to help users optimize their online presence and engagement.

**How we use it:** For tracked and branded links within marketing campaigns.

[Where To Find Or Access It](#)

Notes apps help you capture ideas, organize information, and streamline workflows. T

hese apps provide a digital space to jot down thoughts, manage tasks, and store important documents, which is crucial for maintaining productivity and staying organized.

## Mem

---

Mem.ai is a productivity and knowledge management tool that leverages AI to help users capture, organize, and recall information effortlessly. It integrates with various apps and platforms, allowing you to create notes, tasks, and reminders seamlessly.

Mem.ai also offers advanced features like intelligent search, collaboration, and content linking, making it ideal for individuals and teams looking to streamline their workflows and enhance productivity.

**How we use it:** For ideation and writing our newsletter, as well as other written content.

[Where To Find Or Access It](#)

## Upnote

---

GetUpNote is a note-taking app designed to simplify capturing and organizing ideas, tasks, and information. It focuses on user-friendly features and a minimalist design to enhance productivity.

The app likely supports various note formats, task management, and possibly integration with other tools to help users stay organized and efficient.

**How we use it:** As a knowledge management and note taking solution.

[Where To Find Or Access It](#)

# Sacred Business Flow Creators Stack

---

## Video

---

Video apps enable you to create, edit, and share video content, as well as communicate effectively through video conferencing.

These apps support a range of activities from content marketing to team collaboration, making them essential for maintaining a dynamic online presence.

## Descript

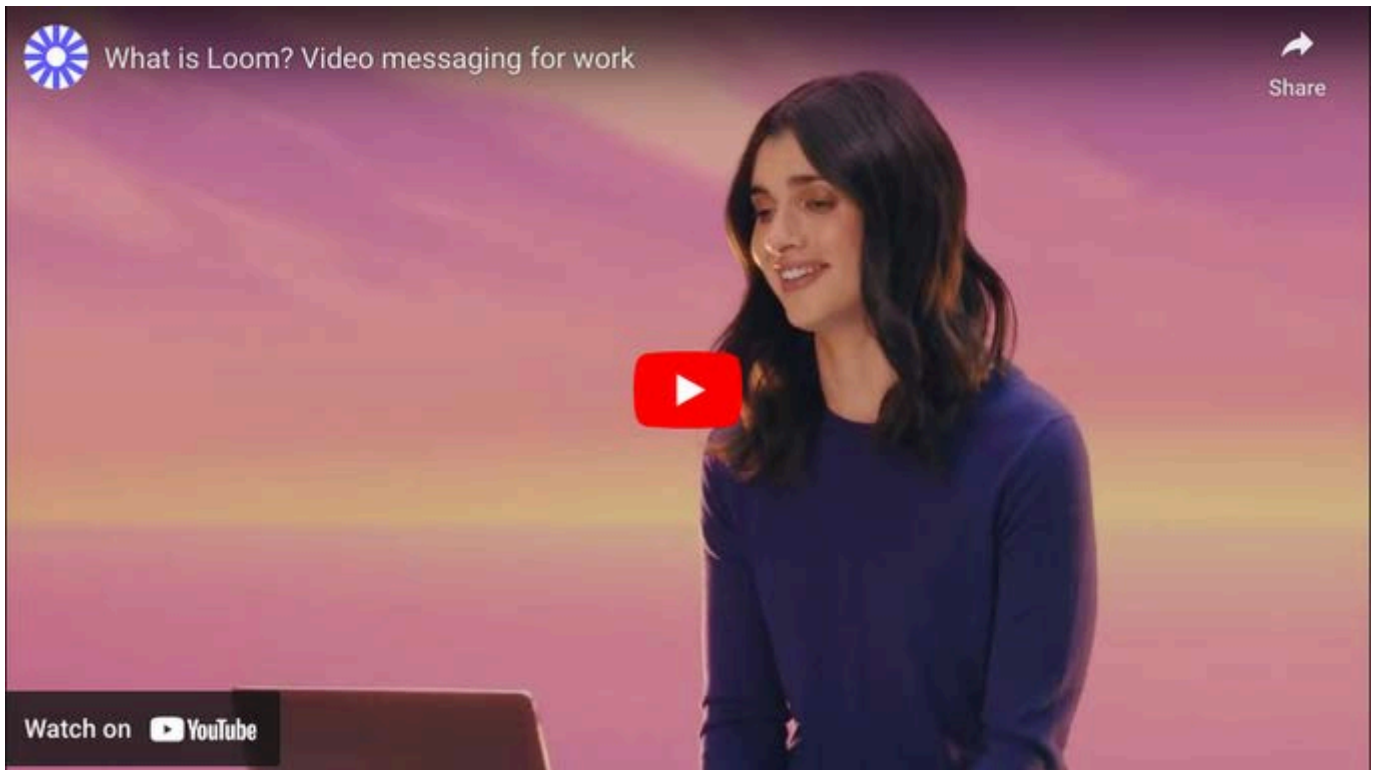

---

Descript is an all-in-one video and audio editing tool that simplifies the creation of podcasts, videos, screen recordings, and transcriptions. It offers features like a text-based editor where users can edit audio and video by editing the text, multi-track editing, AI-powered transcription, and integration with other creative tools.

Descript is designed to make content creation more accessible, allowing users to produce professional-quality work with ease.

How we use it: For video and audio editing of content. We also plan to use this to launch our Sacred Business Podcast.

[Where To Find Or Access It](#)

## Loom

---

Loom is a video messaging tool designed for quick and easy communication through screen recordings and video messages. It allows users to capture their screen, voice, and face simultaneously, making it ideal for tutorials, presentations, feedback, and team updates.

Videos can be instantly shared via a link, and viewers can leave time-stamped comments and reactions.

**How we use it:** For asynchronous video communication with clients, as well as recording weekly video messages for our Sacred Growth Club Community.

[Where To Find Or Access It](#)

## Zoom

---

Zoom is a popular video conferencing platform that offers virtual meetings, webinars, and collaboration tools for businesses, educators, and individuals. It supports features like screen sharing, chat, breakout rooms, and recording.

Zoom is widely used for remote work, online education, and social gatherings, providing an accessible and reliable way to connect with others.

**How we use it:** For internal meetings, private client sessions, as well as Sacred Growth Club community calls.

[Where To Find Or Access It](#)

## Fathom

---

Fathom is a tool designed to enhance Zoom meetings by automatically recording, transcribing, and highlighting key moments. It helps users focus on the conversation without the need to take notes.

Fathom also integrates with various CRM systems, making it easy to sync meeting insights and follow-up actions directly from the recording.

**How we use it:** For sharing meeting notes related to our Sacred Growth Club.

[Where To Find Or Access It](#)

## Website

Website apps allow you to create, optimize, and maintain your websites effectively.

These apps offer functionalities ranging from website building to search engine optimization (SEO) and performance enhancements, ensuring that businesses have a strong and efficient online presence.

## Ghost

---

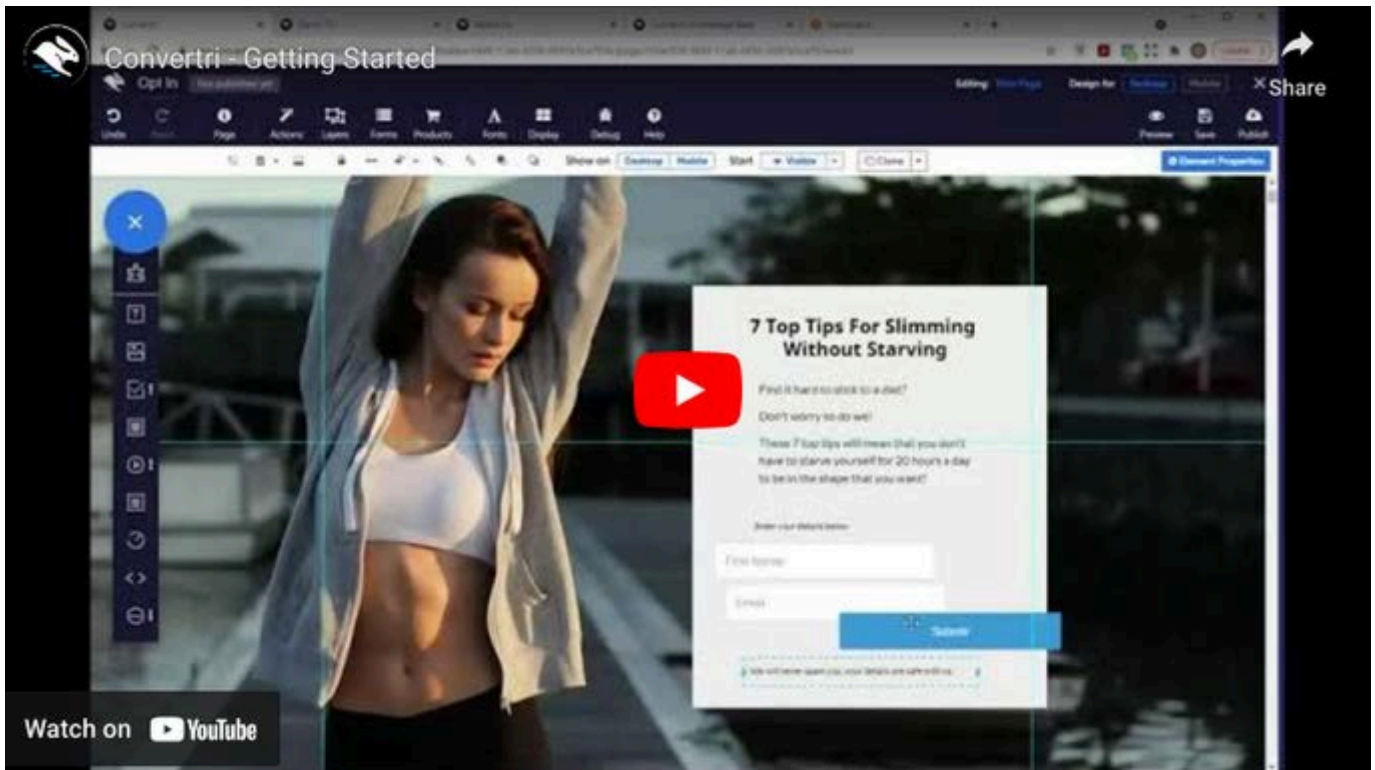

Ghost is a powerful, open-source platform designed for professional publishing. It allows individuals and businesses to create, manage, and monetize content through customizable websites, blogs, and newsletters.

Ghost is known for its clean design, robust features, and flexibility, making it a popular choice for content creators looking to build and manage their online presence.

**How we use it:** To host our website for Sacred Business Flow.

[Where To Find Or Access It](#)

## Convertri

---

Convertri is a funnel builder and page editor that focuses on speed and flexibility. It allows users to create high-converting landing pages with a drag-and-drop interface, and it is optimized for fast loading times.

Convertri also supports advanced features like dynamic text replacement, A/B testing, and integration with various marketing tools. It's designed to help marketers and businesses build effective sales funnels quickly and efficiently.

**How we use it:** For long-form sales pages.

[Where To Find Or Access It](#)

## WarpIndex

---

WarpIndex is a tool designed to automate the process of getting your website's content indexed by Google, which is crucial for improving your site's visibility and SEO performance. It continuously scans your website for new or updated pages and automatically submits these to Google's index, ensuring that your content appears in search results as quickly as possible.

This entire process runs in the background, allowing you to focus on other aspects of website management.

How we use it: To ensure our new content we publish each week on the website is quickly indexed by google for organic reach.

# What's Next?

With your purchase, you actually get access to another tool, which I think is going to add a ton of value for you.

Because if there's anything that we know about the online tech tool and software landscape is that things are always changing and they're changing fast. So oftentimes there's new innovative products coming onto the market. And, especially when it comes to lifetime deals, there's a real window of opportunity where you can make a purchase and this could kind of 10X your value.

Being in this business for over eight years, this is one of the ways I've really kept my costs in control is by making intelligent, informed decisions on lifetime deals. So what you're going to receive with your purchase today of the creator stack is the ability to join my creators toolkit group on WhatsApp.

So this is where every month I will be giving real-time updates or alerts when I see something that I think could add value to your online business. So very often AppSumo as well as other lifetime access deal sites that I monitor regularly, something will come up and I will do a very thorough vetting of these products.

And oftentimes I'll find something that A. I'm going to purchase for my own use or B. I see a real use case for one of my clients. So when those things come up, I'll be sharing that information in real time to this WhatsApp group.

What I can guarantee you is that one to two intelligent purchases over the course of the next year will likely 10X your investment you've made in joining the creator stack. So this is a huge opportunity. It's also a place where if you're like, "Hey Phil, what do you use for this other use case" that you don't see listed, send me a message through that group.

And I'll respond if there's something that I think might be a good suggestion for a tool for you to check out. So that's it. Be sure to click the link below to join the creator's toolkit group on WhatsApp. This is the place to find out the exact tools we're using to run our online coaching business and to help power the businesses of our one on one clients. And yeah, I really just want to thank you for being here.

[Join The WhatsApp Group](#)
